PROFILE SUMMARY

Software Engineering student at Universitas Gadjah Mada passionate about building software through real-world projects. Interested in software engineering, algorithms, and artificial intelligence, with hands-on experience in web and game development.

EDUCATIONAL BACKGROUND

Public Senior High School 1 Pati

2022 - 2025

Science Major

- Final grade: 92/100
- 2nd Place, OSN-K Informatics 2024

Gadjah Mada University

2025 - present

Bachelor of Applied Science in Software Engineering

- A third-semester student with strong enthusiasm for continuous learning and self-development.
- Current GPA: 3.89/4.00

TECHNICAL SKILLS

- Languages: Python, C++, C#, Java, HTML, PHP, JavaScript
- Frameworks: Bootstrap, Tailwind CSS, Unity
- Database: SQL
- Tools: Git, GitHub, VS Code, Figma
- Concepts: Data Structures, Algorithms. OOP, REST API

ORGANIZATIONAL EXPERIENCE

KOMATIK (UGM TIK Student Community)

2026- present

- Member of the Competitive Programming Division, engaging in competitive programming training to develop algorithmic and problem-solving abilities

PERSONAL PROJECTS

- **QuakeSurvive (Unity, C#)**
Educational 2D game that teaches earthquake preparedness through interactive gameplay and mission-based learning.
- **Lapangin (PHP, MySQL, JavaScript)**
Sports court reservation platform featuring authentication, booking management, and database integration.
- **Knight's Adventure (Unity, C#)**
My first complete 2D platformer game, demonstrating gameplay programming, level design, and Unity fundamentals.
- **Around Us (Java)**
A zombie survival shooter built with object-oriented programming principles to practice class design, inheritance, and game logic.
